ENVIRONMENTAL

With society increasingly focused on environmental impact at both local and international levels, the control and management of environmental matters are becoming business critical to many organisations.

BS EN ISO 14005:2015 is becoming one of the world's leading international standards for environmental management and we can assist with implementation and management of the standards requirements.

Qualiteq can assist in the following areas...

We will work with you to design, document, implement and maintain an Environmental Management System based on a preliminary environmental review and customised to regulatory requirements, your aspects, impacts and business needs.

We will assist you through the certification process in order to achieve UKAS accreditation

Why should you Implement a ISO 14001 Environmental Management System?

ISO 14001 is the internationally recognised standard for managing the environmental impacts of businesses. It prescribes controls for those activities that have an effect on the environment which includes the use of natural resources, handling and treatment of waste, and energy consumption.

The standard will guide your business through the controls needed for any of your activities that have an effect on the environment. This includes the use of natural resources, handling and treatment of waste and energy consumption. Implementation of an environmental management system will help your business maintain legal and industry compliance and meet and even possibly exceed your customer requirements.

It also drives continual improvement in the environmental performance of your business and provides a framework for a systematic approach to setting and achieving environmental objectives and targets.

What are the benefits of ISO 14001 Environmental Management Systems?

Identify, monitor and control your environmental aspects and associated impacts

Reduce environmental risk and liability

Maintain compliance with legislative and regulatory requirements

Prevent pollution and reduce waste

Improve environmental performance of your supply chain

Discover areas for reduction in energy usage and other resource expenditure

Achieve cost savings by greater emphasis on resource, waste and energy management

Improve your company's reputation and increase opportunities to win new business

Is ISO 14001 right for you?

ISO 14001 is suitable for all types and sizes of organisation that want to control the effect they have on the environment. By discovering ways to minimise and dispose of waste more effectively, and by being more energy efficient you will not only improve environmental efficiency and productivity, but also reduce the negative impact your business has on the environment.
