

HEALTH & SAFETY

Ensuring your business is compliant with the current Health & Safety Legislation and Codes of Practice can be challenging. Qualiteq is here to help and can provide support ranging from ad hoc advice up to a complete Health & Safety Management system which satisfies the BS OHSAS 18001: 2007-ISO 45001 standard and the requirements of accredited UKAS certification bodies.

We can also manage development of a change strategy and action plan to satisfy the new standard BS OHSAS 18001: 2007-ISO 45001 Occupational Health and Safety Management System (as released in 2017)

Areas where we can assist in Health & Safety include...

Documented Health & Safety Management System (including policy, risk assessments, method statements & COSHH control)

Manual handling and other workplace safety training courses

Assistance with third party health & safety questionnaires & pre-qualification questionnaires

Workplace risk assessments

Independent site inspections

We have extensive experience of managing health & Safety systems with oil & gas, aerospace, maritime and major events sectors.

Why should you implement BS OHSAS 18001: 2007-ISO 45001 Occupational Health and Safety?

BS OHSAS 18001:2007-ISO 45001 is recognised globally as the international standard that enables an organisation to control its Occupational Health and Safety risks and improve company performance. Having a clearly defined management system in place will provide the company with a framework to minimise risks, not only to your workforce but to anyone entering your premises such as visitors or external contractors.

Implementing this standard enables organisations to develop and implement processes for continually reviewing and improving their overall occupational health and safety performance.

What are the benefits of BS OHSAS 18001:2007-ISO 45001 Occupational Health and Safety?

Guide you to create your own health and safety framework; which allows you to integrate processes and their controls into the same management system

Demonstrate you are not only committed to the health, safety and the well being of

your employees, but also of any interested parties and contractors that visit your site

Identify hazards and put in place controls to manage them

Minimise risks of costly downtime through reduction of accidents

Provide your employees with a safe working environment

Provide a robust system to maintain and continually improve health and safety performance

Maintain compliance to legal requirements

Reduce H & S risks and the costs associated with poor health and safety performance

Improve your company's reputation and increase opportunities to win new business

IS BS OHSAS 18001:2007-ISO 45001 right for you?

BS OHSAS 18001:2007-ISO 45001 is suitable for all types of organisation, large and small, that want to provide a safe working environment, reduce risks and meet legal, industry and customer requirements.
